Summary **D9C**: The total **Δ9**-THC content in this sample is 0.17%. For the most accurate **Δ9**-THC concentration, refer to the GC MS/MS section of this COA. This sample was tested using HPLC and GC MS/MS. HPLC analysis can yield inconsistent results for **Δ8**-THC and **Δ9**-THC due to isomer interference: GC MS/MS was employed to avoid this issue. Please note, if THCa is present, the **Δ9**-THC level measured by GC MS/MS might be higher due to decarboxylation.

This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.
